Material Safety Data Sheet

KESTER SOLDER

Page:

1 of 6

MSDS Number: 44 Core Date Prepared:

31-Aug-01

SECTION 1 - CHEMICAL PRODUCT AND COMPANY INFORMATION

Product Identifier As Used On Label: "44" ROSIN FLUX CORED SOLDER

Product Use: Soldering flux in cored solder for electrical or electronic applications.

Manufacturer's Name and Address

Supplier's Name and Address (if different from manufacturer)

KESTER SOLDER DIVISION OF LITTON SYSTEMS, INC. 515 E. TOUHY AVENUE DES PLAINES, IL 60018 USA

Telephone Number For Information: (847) 297-1600

CHEMTREC 24-Hour Emergency Telephone Number: (800) 424-9300

NA = Not Applicable

NE = Not Established

UN = Unknown

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Hot solder can burn eyes and skin. Fumes during soldering are irritating to eyes and may cause headache and respiratory system irritation or damage. Prolonged or repeated exposure to rosin flux fumes during soldering may result in allergic reaction in a sensitive person, resulting in asthma symptoms.

ECC (Europe) DANGEROUS	SUBSTANCES
HAZARD DESIGNATION:	

Xn Harmful

R-PHRASES (Risks to Humans or the Environment):

R 61 - May cause harm to the unborn child.

R 62 - Possible risk of impaired fertility.

R 33 - Danger of cumulative effects.

R 36/37/38 - Irritating to eyes, respiratory system and skin.

PRIMARY EXPOSURE:

Fumes during soldering may contain droplets of rosin and/or other organic decomposition products. Skin contact from handling and decomposition products when heating with soldering iron.

PRIMARY ROUTES OF ENTRY: O Skin

Eyes

Inhalation

Ingestion

TARGET ORGANS:

Flux fumes: eyes, mucous membranes and respiratory system. Ingestion of lead metal can affect kidneys, gastrointestinal, reproductive and neurological systems.

POTENTIAL HEALTH EFFECTS OF ACUTE (severe short-term) EXPOSURE:

INHALATION:

Flux fumes during soldering may cause irritation and damage of mucous membranes and respiratory

system.

EYE CONTACT:

Irritation from contact with smoke from soldering.

SKIN CONTACT:

Possible local irritation by contact with flux or fumes.

INGESTION:

May be harmful if swallowed.

SKIN ABSORPTION: None.

POTENTIAL HEALTH EFFECTS OF CHRONIC (prolonged) EXPOSURE:

Smoke during soldering will contain rosin which is an allergen that can cause eye irritation and respiratory system irritation and damage. Repeated inhalation or ingestion of lead can result in systemic poisoning.

Medical Condition	s Generally	Aggravated	by	Exposure:
-------------------	-------------	------------	----	-----------

Chemical hypersensitivity, asthma and other respiratory conditions, existing eye and skin disorders. Lead: Diseases of the blood and blood-forming organs, kidneys, nerves and possibly reproductive systems.

SECTION 4 - FIRST	AID	MEAS	JRES
-------------------	-----	------	------

Seek medical assistance for further treatment, observation and support if needed.

For burns flush immediately with cool water and get medical attention. For fume irritation use eye drops and EYE CONTACT:

remove from exposure.

SKIN CONTACT: For burns flush immediately with cool water. If a rash develops from flux fumes, remove person from

exposure and wash skin with soap and water.

INHALATION:

Remove person from exposure to fumes.

INGESTION:

Not likely to occur.

Hazardous Combustion Products:

Carbon monoxide, carbon dioxide. Melted solder above 1000 °F will liberate toxic lead

and/or antimony fumes.

Explosion Sensitivity:

Impact - None Identified

Static Discharge Sensitivity:

O Yes ◉

Special Firefighting Procedures:

Avoid breathing smoke. Wear self-contained breathing apparatus if this material is in the

vicinity of a fire.

Unusual Fire and Explosion Hazards: Flux in cored solder may ignite when the solder melts in a fire.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Steps to be Taken if Material is Spilled or Released:

Melted solder will solidify on cooling and can be scraped up. Use caution to avoid breathing fumes if a gas torch is used to cut up large pieces.

SECTION 7 - HANDLING AND STORAGE

Storage Precautions: Exposure to sulfur or to high humidity will tarnish the solder surface.

Handling Precautions: Do not place flux-cored solder into a hot solder pot because the flux may ignite.

Personal Precautions: Avoid breathing smoke / fumes generated during soldering. Wash hands after handling solder before

eating or smoking.

44 Core

Date Prepared:

31-Aug-01

SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION

VENTILATION TO BE USED:

Provide adequate exhaust ventilation (general and / or local) if necessary to meet exposure requirements. Local exhaust ventilation is preferred to minimize dispersion of smoke and fumes into the work area.

Respiratory Protection: When ventilation is not sufficient to remove fumes from the breathing zone, a safety approved respirator or self-contained breathing apparatus should be worn.

Protective Gloves: Wear rubber or cloth gloves to avoid skin

Eye Protection:

Safety glasses or goggles should be used.

contact.

Other Protective Clothing and Equipment:

None.

Hygienic Work Practices: Wash hands thoroughly after handling chemicals or solder containing lead before eating or smoking.

SECTION 11 - TOXICOLOGICAL INFORMATION

EXPOSURE LIMITS: Not determined for the product. See Section 2 for ingredients

Lead can accumulate in bone and body organs, and elimination from the body is slow. Medical examinations are advised for persons repeatedly exposed to levels above the exposure limit for lead. Lead is classified as a Group 2B carcinogen by the International Agency for Research on Cancer (IARC) and the U.S. Environmental Protection Agency (EPA). Women of child bearing age should avoid chronic exposure to lead because of possible effects on reproduction and potential injury to a developing fetus.

SECTION 12 - ECOLOGICAL INFORMATION

Keep out of waterways.

SECTION 13 - DISPOSAL CONSIDERATIONS

Waste Disposal Methods:

Solder can be reclaimed.

CAUTION:

Empty containers may contain product residue. Observe all label precautions.

SECTION 14 - TRANSPORT INFORMATION

DOT (U.S.A.): Not Regulated

TDG (Canada): Not Regulated

SECTION 15 - REGULATORY INFORMATION

U.S.A.: All Chemical substances in this product are listed in the EPA (Environmental Protection Agency) TSCA (Toxic Substances Control Act) Inventory.

USEPA - Lead and its compounds are placed in Class B2, probably carcinogenic to humans. IARC - Lead and its compounds are placed in Class 2B, possibly carcinogenic to humans.

*This chemical is subject to the reporting requirements of Section 313 of Title III of the USA Superfund Amendment and Reauthorization Act (SARA) of 1986 and 40 CFR, Part 372.

California Proposition 65:

This product contains chemicals known to the State of California to cause cancer and

birth defects or other reproductive harm.

Canada:

WHMIS (Workplace Hazardous Materials Information System) CLASSIFICATION:

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Product Regulations (CPR) and the MSDS contains alt the information required by the CPR.
